Accumax Jr. Pipette

Accumax Jr. Pipette

Research indicates that laboratories are in need of a compact, quick and effortless pipetting device that can help them perform small tasks with utter ease. Moreover even small laboratories and college labs cannot afford to buy specialised equipment for training & experimenting purposes.

The Accumax Jr. Pipette is a device born out of that need. Accumax takes a holistic approach to product development by engaging in extensive research about user data which informs the design of the pipette. The result are pipettes that deliver exceptional performance in a compact package with great ergonomics for a great user experience.

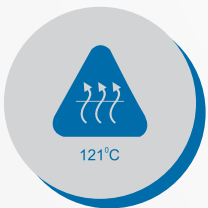

Product Features
